### DETAILED ACTION

This Office Action is response to the Amendment dated 10/17/2005. In the Amendment, the title and Claims **2, 5, 6, 17 and 21** have been amended is acknowledged.

#### *Response to Arguments*

Applicant's arguments with respect to Claims **17-21** have been considered but are moot in view of the new ground(s) of rejection.

#### *Claim Rejections - 35 U.S.C. § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims **17, 18, 20 and 21** are rejected under 35 U.S.C. 102(b) as being anticipated by Honjo (USP 5,012,318).

Regarding claim **17**, Honjo discloses in Fig. 10 and its corresponding texts as set forth in column 8, line 6-column 9, line 11, an integrated pair of HBT 102 and FET 101 transistors, the HRT and FET sharing a contact layer 107, said contact layer serving as both a cap layer 106 for the FET and a subcollector layer 113for the HBT.

Regarding claim 18, Honjo discloses in Fig. 10 the HBT and the FET are isolated by an implanted isolation barrier 121 (col. 8, lines 53-67).

Regarding claim 20, Honjo discloses in Fig. 10 the HRT and FET are GaAs-based transistors (col. 8, line 12).

Regarding claim 21, Honjo discloses in Fig. 10 an integrated circuit comprising an integrated pair of HBT 102 and FET transistors 101.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Honjo (USP 5,012,318).

Honjo discloses the all claimed limitations except for the isolation barrier is formed using a He<sup>+</sup> ion implantation. However, the limitation “the isolation barrier is formed using a He<sup>+</sup> ion implantation” is taken to be a product by process limitation and consider non-limitation. In a product-by-process claim, it is the patentability of the claimed product and not of the recited process steps which must be established. Therefore, when the prior art discloses a product which reasonably appears to be identical with or only slightly different than the product claimed in a product-by process claim, a rejection based on sections 102 or 103 is fair. The Patent Office is

Art Unit: 2818

not equipped to manufacture products by a myriad of processes put before it and then obtain prior art product and make physical comparisons therewith. In re Brown, 173 USPQ 685 (CCPA 1972). Also, a product by process claim directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ I S at 17 (footnote 3). See In re Fessman, 180 USPQ 324, 326 (CCPA 1974); In re Marosi et al., 218 USPQ 289, 292 (Fed. Cir. 1983); and particularly In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985), all of which make it clear that it is the patentability of the final structure of the product "gleaned" from the process steps, which must be determined in a "product by process" claim, and not the patentability of the process. See also MPEP 2113. Moreover, an old and obvious product produced by a new method is not a patentable product, whether claimed in "product by process" claims or not.

#### *Allowable Subject Matter*

Claims **1-13** are allowed.
